Javascript	Express JS	Slack
jQuery	Firebase	
MySQL	java	
Node.js	Materialize	
OOP	Python	
PHP	UI/UX	
ReactJS		
Redux,		

PORTFOLIO

Project Name: BookBird (Github) https://github.com/MichaelCapo23

Phone application to buy and sell textbooks between college students

Tasked with filtering data by ISBN, title and author along with pulling, storing and deleting user datavia **Node.js**, **Axios** and **Express** to communicate with our **MySQL**database

Converted sign in/sign up, and add book pages to **Redux Form** to validate, store and provide positive and negative feedback on user input

Implemented the **Twilio API** for back and forth communication between users via text

Used the **Materialize** to style and make pages responsive.

Incorporated **Google Books API** to ensure accuracy for the books being posted

Project Name: Spotty Concerts(Github) https://github.com/MichaelCapo23

Application to receive users most played artists, locates artist's upcoming concerts, stores and display their locations on Google Maps

Tasked with filtering incoming data finding and setting the users current location and satisfying the parameters of the **SongKick** API to find upcoming events

Received data returned form the **Spotify** API and stored data given from the **Firebase** API

Communicated constantly to receive and format data to store in **Firebase** and map out concerts using **Google Maps** API

(949) 922-6065

Project Name: Student Grade Table (Github) https://github.com/MichaelCapo23

Responsive application to store, display, edit, add and remove students' information

Implemented log in system using **passport-jwt**to create tokens and **Redux Form** to validate user inputs

Used **PHP** along with advanced prepared statements(SQL Queries)to perform CRUD operations with a**MySQL**database

Created dynamic navigation and authorization checking usingHigher-Order components

Made all pages responsive and style them through **Materialize** and it's grid system

WORK EXPERIENCE

August 2015 – Present   Coastline Micro, Inc.
Senior PC/Server Integrator   *Irvine, CA*

- Responsible for integrating and testing desktop and server hardware components and/or subsystems and their interfaces in order to create operational systems
- Works in collaboration with Coastline's project manager for time estimates on project effort, scheduling and delivery
- Flags project slippage, scope and communicates concerns to management and provides approach/mitigation recommendations

COMPLETED EDUCATION

Learning Fuze, Inc.   *2018-2019*
Irvine Valley College   *2016-2018*
